**PLAY MYSTIC FOR ME; BOOKS**

Times of London (TL) - Sunday, January 27, 1991

By: Colin Greenland

Section: Features

Word Count: 691

**TEXT:**

- The Salamander Tree by Robert Lipscombe, H Hamilton Pounds 13.99 pp376.

The packaging and acknowledgments and epigraph of The Salamander Tree are awfully portentous, but it begins like a war novel. Bombers pound Berlin. Then, on heathland at dead of night, a parachuting agent of the Allies, codenamed the Salamander, catches his leg in an ancient man-trap. Within a few pages he has secured the help of a local herbalist by taking her daughter hostage. In a few pages more, captor and captive have fallen in love.

So far, so heroic. But chapter four opens a quite different book. Robert Mark Clare, a part-time writer, tells how, in 1983, he received a mysterious, peremptory commission: to read random extracts from the journals of an anonymous "subject" and compile from them, down a direct computer line to an unknown recipient, a "document in narrative form". Gleeful paranoia and self-reference prevail.

In Paris, Robert finds an educational poster that his subject made. It tells the story of an Indian orphan. Robert retells it, with much elaboration. He himself is of unknown parentage, and often taken to be part-Indian. Georges Bruedermann, a mystical art dealer, lends him other posters, and shows him a painting by Watteau which also entails a story. Spontaneously, Bruedermann then tells Robert the story of another Indian orphan, this time a South American; and insists he reads a 16th-century biography of the self-styled Bartholomew de Gaillac, itinerant botanist, magician and spy.

Robert starts to have mystical experiences of his own. On the way back from Bruedermann's gallery he suffers a bizarre fugue of amnesia and deja vu: "Where was the true location of my hotel?" Then, in case it was not already apparent that we are floundering in a great marsh of a book, where every light is a will-o'-the-wisp and no footing is firm, chapter six turns into the story of Bartholomew de Gaillac.

Robert Lipscombe is far better at re-creating an epoch when magic, science and statecraft were less distinct than he is at jamming alchemy, witchcraft and gnosticism into the cavities of contemporary Europe. He writes best where he is obliged to be most traditional. The hand of a dead young woman is "grey as tallow". Grieving, her elderly father's voice is "like a sawblade caught in the wood". Unfortunately, the Book of Bartholomew runs out halfway through The Salamander Tree, or soon after, and we are left with Robert.

Robert is avid, callow, and thoroughly irritating. "The language, you know, it winks at us," he says; but Lipscombe's language positively climbs into our lap and grins in our face. Every character, object, episode, parallel and coincidence is announced with hints and omens, and departs

trailing opaque significance. Nothing can ever cohere, because everything is ambiguous. The Watteau may or may not be a notable forgery; the Salamander may or may not have been bewitched; an elderly monk was either chief scientist or chief subject in a vile Nazi experiment, depending on which of his consecutive declarations we choose to believe. He may also be Robert's father. The novel offers both Robert and Bartholomew a whole identity parade of false fathers. Macho and gnarled, the Salamander, who talks like William Burroughs, is another candidate for Robert. A third, symbolically, is Bruedelmann himself. Mothers come and go, too, in these pages, and dramatically amorous young women; but neither as plentifully as fathers.

Confusion, uncertainty, unreadiness to sort flesh and fowl from good red herring: these are faults that commonly beset new novelists. To convince us that the indecision of the author equals the mystery of the universe, to pass off great clots of occult impenetrability as cosmic revelations: that takes much more skill. For a man anxious to achieve a novel, Lipscombe seems altogether too admiring of "the historical tradition of enigmatic writing...the custom amongst adepts and magicians to obscure their truths from the vulgar mind by **steganographic** and metamorphic means".

**Steganographic**, to save you the trouble, means writing in cipher. Customary amongst adepts and magicians it may be, but how much more so amongst charlatans and poseurs.

...the custom amongst adepts and magicians to obscure their truths from the vulgar mind by **steganographic** and metamorphic means". **Steganographic**, to save you the trouble, means writing in cipher. Customary amongst adepts and magicians it...
